UCARES Frequency Plan

Designation	Mode	Frequency / (offset & tone)		Notes
		Primary	Backup	
2 Meters				
"34" Repeater	Phone	147.340 MHz (+100Hz)	147.340 Mhz (+141.3Hz)	Primary repeater, linked to 145.230 repeater
"23" Repeater	Phone	145.230 MHz (-131.8Hz)	N/A	Tertiary repeater, linked to 147.340 main repeater
"28" Repeater	Phone	147.280 MHz	N/A	Secondary repeater

		(+141.3Hz)		
"47" Repeater	Phone	145.470 MHz (- 100Hz)	N/A	Secondary Repeater, Utah Valley Hospital
2 Meter Simplex	Phone	146.460 MHz		
2 Meter Simplex	Packet	145.030 MHz		Digital modes, ARES Pack, fldigi
70 Centimeters				
"975" Repeater	Phone	449.975 MHz (131.8Hz)	N/A	Lake Mountain
449.325 Repeater	Phone	449.325 (- 100Hz)	N/A	Utah Valley Hospital
448.325 Repeater	Phone	448.325 MHz		Provo Canyon
Other important frequencies:				
Utah County Info net	Phone	146.760 Simplex		Info net
SLC County Info net	Phone	146.620 MHz Simplex	146.940 Mhz	Info net
Utah RACES Repeaters	Phone	147.120 & 147.180 (100Hz)	N/A	Intermountain Intertie
Utah RACES repeater (SLC)	Phone	449.425 MHz (- 100Hz)	N/A	Linked state RACES frequency
Utah RACES HF	Phone	3920 kHz LSB	N/A	
State Wide Simplex	Phone	146.520 MHz Simplex		State Wide Calling Frequency

Call out procedures

The following outlines the activation procedures for Utah County ARES. Activation can be initiated by any one of the served agencies with which we have signed statement of understanding (SOU/MOU). The served agency would initiate the activation request through their assigned UCARES liaison. The liaison would then contact the Emergency Coordinator (EC) or one of the Assistant Emergency Coordinators (AEC) if they are unable to reach the EC, who would then be responsible for sending an activation net announcement via Everbridge, announcing the time and frequency of a "staffing" net. If the situation merited, additional phone calls should then be made to the remaining AEC's to bring sufficient manpower to man the various nets that would be set up at the discretion of the EC and/or AEC in charge of activation. Should additional support be required from the UCARES membership, than what was obtained from the staffing net, the AEC's would be asked to contact additional members by phone to recruit additional support staff.

In the event of any emergency, all UCARES members are expected to monitor the primary UCARES repeater unless they have already been specifically assigned to an alternate frequency or NET. When a staffing net is called, the Net Control may either ask for all members to check in with status and availability, or NCS may specifically call for only those who are available. This can vary on the requirements of the call-out. However, all members are expected to monitor the staffing net if at all possible, even if they are not immediately available for service.
